Architecture-trained systems thinker with 7+ years of experience spanning AI product commercialization, enterprise digital transformation, solution delivery, and global GTM across China, North America, and the Middle East. Skilled at identifying high-value AI use cases, translating technical capabilities into scalable workflows and solutions, and aligning customers, product, engineering, and executives from discovery through adoption and growth.

EXPERIENCE

Mingyuan Cloud | Solution BD

Riyadh, KSA | May 2025 – Aug 2025

- Spearheaded enterprise solution for large-scale government and infrastructure clients in Saudi Arabia. Coordinated across internal product, engineering, and external ecosystem partners (Huawei, STC Solutions), increasing ASP by 20%–30%.
- Acted as the primary technical and commercial interface for Saudi Arabia's national megaprojects, including KSPF (\$10.5B) and Green Riyadh (\$110B). Managed alignment up to the Chairman level through technical roadmaps and live product/algorithm demonstrations.

LAIPIC.AI | Strategic BD

Dubai, UAE | Nov 2024 – Feb 2025

- Designed and executed go-to-market programs for AI products in the Middle East, including customer segmentation, positioning, and early-stage partner engagement with reseller and retailer to drive structured market entry.
- Built conversion funnel structure to evaluate campaign effectiveness and optimize sales and marketing execution.

Coohom | Product Owner

Shanghai - New York | May 2023 - Sep 2024

- Led the transformation of a vertical SaaS platform serving AEC professionals into an AI-powered 3D asset management platform. By focusing on rebranding, user activation, and AI feature adoptions, the GTM strategy contributed to a 5-time surge in Active Users and 15% revenue growth in 6 months.
- Owned AIGC feature development integrating multimodal AI models (LoRA, IP-Adapter) into user workflows. After launch, I conducted 30+ customer interviews to identify high-value use cases, which contributed to a 350% increase in WAU.
- Developed a structured testing framework to diagnose compromised model performances across LoRA weights, prompts, and inference parameters. Introduced ControlNet-based structural constraints and a domain-specific negative prompt library, improving output consistency, and production readiness for professional design workflows.
- Developed and executed growth campaigns across paid Ads Campaign, SEO, content marketing, and KOL channels to drive user acquisition and engagement, increasing overall exposure by 300%, and improving CTR by 2.6 percentage points through continuous performance optimization.

Longfor Properties | Product Manager

Shanghai, China | Sep 2020 - Aug 2022

- Led end-to-end execution of enterprise digital transformation program focused on commercial operations, covering user research, solution design, prototyping, rollout planning, and post-launch optimization.
- Coordinated cross-functional stakeholders across business units, operations, and technical teams to align requirements, manage dependencies, and ensure consistent execution across rollout phases.
- Established structured KPI tracking and reporting mechanisms to monitor system adoption, operational performance, and business impact across multiple departments.
- Drove a machine learning-based anomaly detection program that improved auditing accuracy by 300% and contributed to measurable revenue uplift (~¥33.6M RMB annual impact).

HDR & Rockwell Group | Project Manager

New York, NY | Sep 2017 - Apr 2020

- Managed multi-stakeholder project delivery across architecture, engineering, and construction teams for large-scale commercial and infrastructure projects. Coordinated external vendor execution to ensure timely delivery of project milestones.
- Introduced technological advancements into an open-source framework solution, which significantly improved cross-team collaboration efficiency.

EDUCATION

Columbia University Master of Science in Architecture	New York, USA, June 2016 - June 2017
Tongji University Bachelor of Architecture	Shanghai, China, Sep 2010 - May 2016

SKILLS

Expertise: AI Product Strategy | Enterprise AI Transformation | Strategic Programs | Solution Consulting | Multimodal AI | Workflow & SOP Redesign | PMF Validation | Global GTM | SEO/SEM | A/B Testing | Product Analytics
